DETAILED ACTION

This application claims the benefit of the filing date of provisional applications 60/153,281 and 60/164,616.

Claims 1-62 have been canceled.

New claims 63-73 have been added, are currently pending and are the subject of examination in the present Office Action.

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on December 19, 2003 has been entered.
2. In view of Applicant's amendment filed December 19, 2003, all outstanding grounds of rejection are withdrawn.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claims 63-73 are rejected under 35 U.S.C. 112, second paragraph, as being incomplete for omitting essential steps, such omission amounting to a gap between the steps. See MPEP § 2172.01. The omitted steps are:

In base claim 63, the method is drawn to preparing a binding compound, however there are no preparative steps recited in the method. The method recites "preparing candidate antibodies by using the IL-B30/p40 complex" and "determining the specificity of the candidate antibodies...thereby identifying said antibody." The claim does not comprise a step where the "using" of the complex is disclosed. How is the complex used? For example, is it to immunize animals to generate the antibodies or is it used on a column to isolate naturally occurring antibodies from a serum sample? The concluding statement of "thereby identifying said antibody" suggests that no antibodies are made by a method of the invention,

but that they are merely identified. There is no connection between the "preparing a binding compound" in the preamble of the claim and the conclusion of "thereby identifying said antibody." The statements are not linked by any rational, cohesive steps, resulting in a gap in the claimed method.

Base claim 69 is similarly flawed. The claim is drawn to a "method of preparing a binding compound that specifically binds" to the IL-B30/p40 complex. However, the claim comprises only a single step of "selecting said binding compound from candidate binding compounds that bind to the IL-B30/p40 complex." The claim does not comprise a preparative step whose execution would allow the selection of any binding compounds.

Conclusion

4. No claim is allowed.
